Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Reiser (US 2001/0002299) discloses a fuel cell stack "26" comprising a fuel inlet/exhaust manifold "29" & "31" and a fuel turn manifold "30", wherein the fuel inlet/exhaust manifold has a fuel inlet and a fuel exhaust which are accessible from a first face of the fuel inlet/exhaust manifold (See Figure 4a). Nishiumi et al (US 2002/0187382) discloses a pair of fuel cell stacks "223" and a plumbing arrangement interconnected between a reactant gas supply pipe "235bi" and the inlet/outlet manifold inlets "231b inlet" and an exhaust plumbing extending from the outlets "231b outlet" of the inlet/outlet manifold to an exhaust pipe "235bo" (See Figure 8). However, Reiser as modified by Nishiumi et al does not expressly teach a plumbing interconnecting with one of the inlets on a first face of a first one of the inlet/outlet manifolds and interconnecting with another of the inlets on a second face of a second one of the inlet/outlet manifolds; an exhaust plumbing extending from an outlet on the first face of the first inlet/outlet manifold and from an outlet on the second face of the second inlet/outlet manifold; and a pair of seal plates, one disposed on the second face of the first inlet/outlet manifold and one disposed on the first face of the second inlet/outlet manifold, whereby to close off the inlet/outlet manifolds.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tony Chuo whose telephone number is (571) 272-0717. The examiner can normally be reached on M-F, 7:00AM to 3:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on (571) 272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
